Version: **V49/release/11.00**

Set Up Requests

Area

<ul style="list-style-type: none"> Kits admin page now does a menu item access check instead of a hard-coded admin role check 	Campaigns/Kits
<ul style="list-style-type: none"> Add {TaskActivity} placeholder to the task assigned email 	Emails

Bug Fixes

Area

<ul style="list-style-type: none"> Fixed proofs duplicating on job when a job has multiple production paths. 	Artwork/Proofs
<ul style="list-style-type: none"> Fixed issue with not required kit items still appearing in some quote letters 	Branding/ Mark Up Templates
<ul style="list-style-type: none"> Add tax factor to kits in the quote model 	
<ul style="list-style-type: none"> Fix crash when creating dynamic catalogue from the kits admin page 	Campaigns/Kits
<ul style="list-style-type: none"> Fix display of kit details in the sales order grid when kit has jobs with different picking statuses 	
<ul style="list-style-type: none"> Fix operation component weight per area saving as a weight instead of a paper weight 	Freight
<ul style="list-style-type: none"> Resolved error when trying to quote ganging run from CSV upload. 	Ganging
<ul style="list-style-type: none"> Fixed issue with attempted invoice exports that fail still marking the invoice as successfully exported in certain scenarios 	Integration (API/Webhooks)
<ul style="list-style-type: none"> Added a new setting called ""XMPie Force Freight By Cart"" that forces all quotes to be made in that mode instead of honouring the system setting 	
<ul style="list-style-type: none"> Added extra information into the invoice history specifically around what customer the invoice is created for and if that changes 	Invoicing
<ul style="list-style-type: none"> Fix sort order of money columns on the awaiting invoice board 	
<ul style="list-style-type: none"> Stop update factory location crashing on second attempt after failed to price 	Jobs/Production
<ul style="list-style-type: none"> Fixed orders screen crashing when an accepted promo kit exist with a sales item without a description. 	
<ul style="list-style-type: none"> Added an IQ link option ""Always use resellers description"" set on the suppliers printIQ to not take the description from the resellers quote/job 	
<ul style="list-style-type: none"> Fixed an issue where sorting by Ship Date on the All Jobs Board produced incorrect results. Jobs are now sorted in the correct chronological order. 	Performance
<ul style="list-style-type: none"> Fixed the webhook queue crashing when trying to process a product that was used on a kit that has since been made inactive 	
<ul style="list-style-type: none"> Fixed copied standard reports not downloadable. 	Power-BI
<ul style="list-style-type: none"> Fixed copy power BI link for standard reports not copying report state 	
<ul style="list-style-type: none"> Fixed an issue where generating an Inventory Purchase Order letter would fail with an error when certain line detail fields contained no value 	Purchase Orders
<ul style="list-style-type: none"> Fixed quote tax not calculating when the job operation is set to invoice actuals but there are no actuals captured for a quote 	Quoting

Patch Release Notes

<ul style="list-style-type: none"> Fixed selected quantity not being restored when toggling item required/not-required. When a product with multiple quantities had a quantity selected and was marked as "not required", then set back to "required", the previously selected quantity was not restored. The correct quantity is now remembered and re-selected automatically. 	
<ul style="list-style-type: none"> Resolved issue so when using "Click to include Finishing Spoils" in the component record, it add the click count including finishing spoils. 	
<ul style="list-style-type: none"> Fixed duplicate pick requests showing on Stock Pick screen after returning partial picks that were split from a reservation 	Stock/Inventory
<ul style="list-style-type: none"> Fixed not being able to specify \$0 as a stock pick adjustment. 	
<ul style="list-style-type: none"> Fixed quantity dropdown closing the cart popup when selecting a value in Chrome. 	
<ul style="list-style-type: none"> Resolved issue so when a sales items has 'Set quantity break' pricing the quantities set it displays in the quantity drop down when ordering. Any handling charges are also applied correctly. 	Store/Sales Item
<ul style="list-style-type: none"> Prices in simplified image modal now hidden if user has hide pricing setting to true 	Users/Customers/
<ul style="list-style-type: none"> Customer upload made so if the customers current default address is the current billing address keep it this way and dont override the default address to the delivery address on import 	Contacts
