Bug Fixes

Area

<ul style="list-style-type: none"> Fix display of unplanned lists after moving a card. 	Capacity Planner
<ul style="list-style-type: none"> Resolve issue of Requires Signoff value is not saving when click on save button. 	Freight
<ul style="list-style-type: none"> Fixed FedEx integration showing an error when turning on for the first time when first configuring for a customer after turning on the associated freight customer. 	
<ul style="list-style-type: none"> Added a couple fallbacks to data that gets sent to DPD when creating consignments: if there is no address name specified on the destination address, send the customer company name instead and if there is no phone number on the destination delivery contact, send the customer phone number instead. 	
<ul style="list-style-type: none"> Made sure when creating a consignment in DPD with a weight of anything higher than 0, we make sure the weight we send to DPD is at least 100 grams to avoid a "1019 - Number not in range" error coming back from DPD. 	
<ul style="list-style-type: none"> Make over under icon on the awaiting invoice board display clearly. 	Invoicing
<ul style="list-style-type: none"> Misc charge description made to not overlap on long text such as emails in the modal. 	Jobs/Production
<ul style="list-style-type: none"> When accepting a quote via the quote email link, show the "Guest" user in some places on job history instead of the person who sent the email. 	
<ul style="list-style-type: none"> Resolve issue of incorrect display ordering on pre-press board after status update from all jobs board 	
<ul style="list-style-type: none"> Resolved a race condition where the initial GetComponent call replaced the newer response after changing Component Type and Press. 	
<ul style="list-style-type: none"> Stop print date from showing when multiple jobs are selected on the all jobs board. 	Other Modules
<ul style="list-style-type: none"> Selecting child jobs in the production orders board will now allow setting of series without error. 	
<ul style="list-style-type: none"> Usage of function inside board procedure was inefficient - split this to pre-calculate and improve performance. 	Performance
