Bug Fixes

Area

<ul style="list-style-type: none"> Fixed calculated tax clearing from first product when calling the get price API call multiple times for the same quote. 	API / Webhook
<ul style="list-style-type: none"> Fixed an issue where auto-generated invoice PDFs from OPO deliveries could fail to render due to incorrect access validation. Invoices triggered by supplier consignment dispatch now correctly use the generated access link. 	Emails
<ul style="list-style-type: none"> Prevented problems with deleting old files from interfering with sending proofs. 	
<ul style="list-style-type: none"> Fixed section operating duplicating when a second is removed on Simplified Session/Products. 	Factory set up
<ul style="list-style-type: none"> Fixed issue when updating stock size to roll in modal would crash on save. 	
<ul style="list-style-type: none"> Fixed the checkout screen popping up an error message when setting "Automatically calculate freight when possible" was turned off. 	Freight
<ul style="list-style-type: none"> Freight integration references sources now inherit the base account setup for customer and site overrides as there's currently no way to set them at that level. 	
<ul style="list-style-type: none"> Make UPS silently error if credentials fail as has been the previous functionality. 	
<ul style="list-style-type: none"> Fixed issue with not getting a unique consignment number for each delivery when creating a consignment via the gosweetspot integration. 	
<ul style="list-style-type: none"> Fixed an issue where shipping rates from integrations were not appearing in the Check Price results on the Manage Freight screen for addresses in countries that use states or provinces (United States, Australia, Canada). 	

Patch Release Notes

<ul style="list-style-type: none"> Added a new setting <code>Outsource_ConsignmentNumberFormat</code>. This is used when writing the consignment number for external consignments created from outsource purchase order deliveries. Supported placeholders: <code>{ConsignmentNumber}</code>, <code>{Courier}</code>. Default: <code>{ConsignmentNumber}</code>. Example: <code>{ConsignmentNumber} - {Courier}</code>. 	
<ul style="list-style-type: none"> Fix an error causing quote adjustments to present an error, also affecting Infigo orders. 	Integration (API/Webhooks)
<ul style="list-style-type: none"> Fixed the payment screen sometimes stating that a payment is in progress when it is not. 	Invoicing
<ul style="list-style-type: none"> When an invoice is loaded with a foreign currency for a customer prevent editing the invoice changing price to 0 automatically. 	
<ul style="list-style-type: none"> Handle a credit term due date being current month with a value less than 1, this will now set the value for example 0 to equal 1 preventing invoice crashing. 	
<ul style="list-style-type: none"> Fixed an issue where the PAY button was not appearing on the Orders page when creating new credit terms or modifying existing credit terms with the 'Is Payment Gateway' option enabled. 	
<ul style="list-style-type: none"> Add link button to sales order invoice lines no matter the invoice mode 	
<ul style="list-style-type: none"> Fixed missing description in view <code>VW_Reporting_QuoteProducts</code> within the reporting module 	Izenda
<ul style="list-style-type: none"> Fixed an issue where order import could fail with a conversion error when freight charges had not yet been calculated for the order. 	Jobs/Production
<ul style="list-style-type: none"> Fixed an issue where clicking Update on the Set Job Series modal without selecting a series value or enter a series value would cause an error 	
<ul style="list-style-type: none"> Fixed requesting version upgrades to honor the versions found by the system 	Other Modules
<ul style="list-style-type: none"> "When a supplier invoice tied to an outsource purchase order is approved, we now only mark the purchase order as completed if the status is in goods or invoice received." 	Outsource
<ul style="list-style-type: none"> Fixed issue where <code>AutoSelectEstimates</code> could run for far longer than intended in specific cases 	Performance
<ul style="list-style-type: none"> Fixed issue with users being able to create multiple consignments for the same dispatch records 	Power-BI
<ul style="list-style-type: none"> Fix for creating an IPO for a sales order and then adding additional sales items to that IPO getting insert constraint error 	Purchase Orders
<ul style="list-style-type: none"> Fixed calculations for quote adjustments <code>Target Value Add %</code> and <code>Target Contribution %</code> 	Quoting
<ul style="list-style-type: none"> Fixed the manage turn around times button not working on product categories when there is a large amount of data 	
<ul style="list-style-type: none"> Fixed issue with the customer requested date sometimes being set despite the user never manually selecting a customer requested date 	
<ul style="list-style-type: none"> Fixed issue with the wrong currency symbol sometimes displaying in pricing tooltips 	
<ul style="list-style-type: none"> Fixed an issue where section operations with outsourced finishing and no pricing components were returning a price instead of showing ""Not Priced"". 	Stock/Inventory
<ul style="list-style-type: none"> Fixed an issue where the minimum cost setting on a Stock Cost Plus component was not applied when no markup factor was configured. 	
<ul style="list-style-type: none"> Fixed inventory pick requests going in as 0 due to rounding of the charge amount for only priced printed area stocks 	
<ul style="list-style-type: none"> Fixed orphaned user record in DB prevent visibility on user board. 	Users/Customers/Contacts

Patch Release Notes

Release Date: **25/05/2025**

Version: **V49.1/release/06.00**

Set Up Requests

Area
