

Patch Release Notes

Release Date: **31/03/2025**

Version: **v48/release/11.00**

Set Up Requests

Area

<ul style="list-style-type: none"> Rework details added to job bag report template. 	Branding/ Mark Up Templates
--	-----------------------------

Bug Fixes

Area

<ul style="list-style-type: none"> In the API, fixed the blind ship address specified in the request for a GetPrice call never actually being used. 	API / Webhook
<ul style="list-style-type: none"> Fixed issue passing Authtoken to open certain markup templates. 	
<ul style="list-style-type: none"> Fixed an issue so when replacing a rejected proof and sending off a new proof for approval, if the new proof is approved, both the new proof and the replaced/rejected proof are marked as approved. 	Artwork/Proofs
<ul style="list-style-type: none"> Grab the correct Nup value for display of kinds with Nup in the job bag. 	Branding/ Mark Up Templates
<ul style="list-style-type: none"> You can now correctly replace images on existing kits. 	
<ul style="list-style-type: none"> When editing an address details from the freight modal make sure any notes showing remain after save of address. 	Freight
<ul style="list-style-type: none"> Resolve issue of series modal in operation board. 	Jobs/Production
<ul style="list-style-type: none"> Fixed issue so when using a step and repeat press with a versioned quote/job, the versions per run are correctly displayed on the quote screen and job bag. 	
<ul style="list-style-type: none"> Stop job note of invoicing type duplicating when copying to the invoice. 	Notes
<ul style="list-style-type: none"> When invoicing a sales order, any sales order notes of type invoicing will be transferred across to the invoice as they do with jobs. 	
<ul style="list-style-type: none"> Fixed an issue for when editing the pricing grid to manually change the charge unit cost, the chargeable amount of sheets should remain consistent with the charge sheets value, not the required sheets value. This ensures that the price per thousand sheets is calculated accurately based on the charge sheets rather than being artificially inflated due to a mismatch in sheet quantities. 	Pricing
<ul style="list-style-type: none"> Pricing detail tooltips now display the correct currency symbol instead of always showing ""\$"". 	Quoting
<ul style="list-style-type: none"> Fixed issue where we weren't finding the replacement active products and it was causing the copy quote to fail. 	
<ul style="list-style-type: none"> Fix amount of clicks calculation being incorrect when click all produced items is on. 	
<ul style="list-style-type: none"> Fixed issue for where when lots are used in printIQ, the lotsplitter loop ignores non-lot QOH, causing the wrong quantity to be deducted when doing adjustments. 	Stock/Inventory
<ul style="list-style-type: none"> Fixed problem with quantity on hand on lots sometimes displaying incorrectly for stocks managed by weight. 	
<ul style="list-style-type: none"> Adjusted inventory location admin screen to not overlap footer.

<ul style="list-style-type: none"> Allow Cartons with Max Width/Depth to work with custom shapes (base the width/depth off the Flat Width/Depth of the product after shape calculation). 	
<ul style="list-style-type: none"> Added ability to change the requested label size in the FedEx integration. 	
<ul style="list-style-type: none"> Custom proc to assign lots to inventory items without lot set and not on a po line. 	Stock/Inventory
<ul style="list-style-type: none"> Added a setting called "Pass PO required date to suppliers printIQ" when creating an PO using IQ Link if this setting is on we'll pass the required date to the suppliers print IQ and update the expected date on their job. 	IQ Link
<ul style="list-style-type: none"> Added history records to quotes and jobs when address, contacts or required dates are changed. 	Jobs/Production
<ul style="list-style-type: none"> Added new "Billing Customer" column to the Awaiting Invoice Board and allow users to create invoices from jobs with either matching billing customers or matching customers. 	Invoicing

Bug Fixes

Area

<ul style="list-style-type: none"> Make sure build menu items are not affected by a release. 	Factory set up
<ul style="list-style-type: none"> In the new FedEx API fixed the residential flag not being passed when booking a shipment. 	Freight
<ul style="list-style-type: none"> In the new FedEx integration added some code to reduce the company name down to 35 characters before booking shipments to honour their API spec. 	
<ul style="list-style-type: none"> When editing freight on a job fixed incorrect dimensions being passed into the freight calculator 	
<ul style="list-style-type: none"> Fixed issue for editing the job, changes are now reflected in job XML. 	Integration (API/Webhooks)
<ul style="list-style-type: none"> Fixed issue so when the main gang job status updates, the child jobs also update on screen without a refresh. 	Jobs/Production
<ul style="list-style-type: none"> Fixed an issue so on a quote for all quick product(s) where the location setup is set for a site, it will select and show the site on the Press-Press and Job area's of the quote. 	Quoting

Patch Release Notes

Release Date: **31/03/2025**

Version: **v48.2/release/03.00**

Set Up Request

Area

Added toggle to allow the invoice mode modal to be opened on invoice detail screen to allow changing invoice settings to reduce number of lines and process the invoice faster. This will be locked down if the invoice is saved or has been edited.	Invoicing
Add new option to invoice mode model for how deliveries are to be invoiced.	
Updated terminology of invoice mode setting values to be more self-explanatory.	

Bug Fixes

Area

<ul style="list-style-type: none"> Fixed issue with verified weight not updating on screen after save. Visual issue. 	Freight
<ul style="list-style-type: none"> Fixed consignment creation on job details not updating dispatched text near invoice button. 	
<ul style="list-style-type: none"> Resolve issue of delete existing consignments on import distribution 	
<ul style="list-style-type: none"> Fixed issue so Terminology set on the Dispatch Label is applied to buttons which take you to the Dispatch Board. 	Quoting
<ul style="list-style-type: none"> Fixed product range items being removed from other ranges when saving them against a second range 	
<ul style="list-style-type: none"> Added ability to define a min and max frame length within the components of a section level operation. 	
<ul style="list-style-type: none"> Fix operation based spoils from calculating incorrectly on sections 	
<ul style="list-style-type: none"> Fixed issue with users being able to order an import plus session as a custom quote via the product catalogue board 	
<ul style="list-style-type: none"> Fixed issue where certain price by quantity setups could cause products to incorrectly fail to price when ordering certain quantities of them 	
<ul style="list-style-type: none"> Fixed issue so NUp Override die setting can be edited as in earlier versions. 	
<ul style="list-style-type: none"> Fixed not being able to update advanced kinds names in custom quoting 	
<ul style="list-style-type: none"> Fixed kind name must be unique message appearing when trying to edit a kind that has a number for the name
